

## QUALITY POLICY

Alfarrasí, a 30 de abril de 2025

The company **Plásticos Industriales y Comerciales de Alfarrasí S.L. (PICDA S.L.)**, dedicated to:

"Extrusion, printing and cutting of polyethylene film and bags for food (virgin) and non-food (virgin and/or recycled) use. Lamination, printing and cutting of plastic multilayer film for food use. Printing and cutting of non-food grade paper. Conversion of paper reels into bags with or without flexographic printing."

In continuity with the actions carried out since its foundation, has decided to adopt a Product Quality and Safety Management System, based on the BRCGS Packaging Materials Standard, applied across all areas of the company, and therefore commits to:

- Comply with all applicable legal and regulatory standards in the performance of our activity, by developing safe products that meet legal and regulatory requirements, as well as the quality criteria agreed with our customers and stakeholders.
- Implement, review, and maintain a traceability management system that ensures compliance with all requirements established in the standards implemented in the company: UNE-EN 15343, UNE-EN 53930, UNE-EN 13592, Blue Angel, Chain of Custody Certifications.
- Update and maintain the documented management system, through procedures and instructions that aim to improve the quality and safety of the products, and to establish work systems that facilitate the necessary actions for the efficient resolution of customer complaints.
- Continuously select and evaluate our suppliers and subcontractors, ensuring we can provide the best service to our clients.
- Continuously improve process performance, service suitability, and product quality and safety, by optimizing resources and including communication systems with clients, in order to detect their needs and advise them to find the product that best suits those needs, thus generating and/or strengthening their trust and level of satisfaction.
- Foster and maintain a motivating environment for all company members, promoting staff participation as a key element to position the company within its sector and create a corporate culture that also generates stable job opportunities.
- Raise awareness and sensitize all company members to the development and continuous improvement of a quality and product safety culture.
- Minimize environmental impact by optimizing energy consumption, promoting the responsible use of resources and the correct segregation of generated waste, as well as the prevention of pollution resulting from our activities.
- Promote and support the development of commitments among all parties (suppliers, customers, and workers) in order to achieve the development, monitoring, and improvement of the Management System.

To achieve these objectives, management undertakes to review and amend this policy as necessary to ensure compliance with the acquired commitments, as well as to communicate this policy to all members of the organization and any interested external parties.

David Rejon Asenjo  
Director General
